

How to make best use of the spell checker card

The cut out window isolates words which will make it easier for the child to concentrate on the task of checking each spelling rather than getting distracted by the content.

1. The adult should write up to 5 target words on the card.
2. The spell checker is then used by a child once they have written some independent work.
3. The spell checker is moved left to right across each line to check the spelling of target words.

Example
